

Building Permit Fees¹

The building permit fee charged to build a new building, to add on to an existing building, to remodel or to alter an existing building shall be based on the declared valuation of the proposed work. The declared valuation shall include the fair market value of the proposed improvements, including the architectural, structural, electrical, plumbing, mechanical work, paving, parking, drive approach, and the contractor's profit. For one- and two-family dwellings only, the value of \$75.00 per square foot of living area shall be used to determine the valuation (for new construction only) for the purpose of computing permit fees in accordance with Table 1. The Building Official may require the applicant to verify the declared value. The building permit fee shall be calculated based upon figures from Table 1. Any fee listed in this resolution as "based on valuation" means the fee shall be based on the valuation of the proposed improvement in accordance with Table 1.
