

Resources for Educators and Parents

- The WaterSense for kids page from EPA.gov (<https://www.epa.gov/watersense/watersense-kids>) has interactive games for kids and lesson plans for educators about water conservation and other water-related topics.
- The Water's Worth It website (<https://watersworthit.org/resources/>) from the Water Environment Federation has downloadable coloring sheets, word scrambles and informative fact sheets for kids.
- The Texas Water Development Board Kids website (<http://www.twdb.texas.gov/conservation/education/kids/>) serves as the gateway to the agency's K-12 conservation education resources. The web site also features visualization, interactive games, and other activities to help students learn about key concepts, such as water cycles, watersheds, water use, and water conservation.
- DrinkTap.org (<https://drinktap.org/Kids-Place>) is the American Water Works Association website that tells the story of the water cycle and how water is treated for drinking.
- The Water Is Awesome website (www.waterisawesome.com) from Tarrant Regional Water District has tips for indoor and outdoor water conservation and fun facts about water.
