

Targeted Ground Spraying Area

West Sanford Street

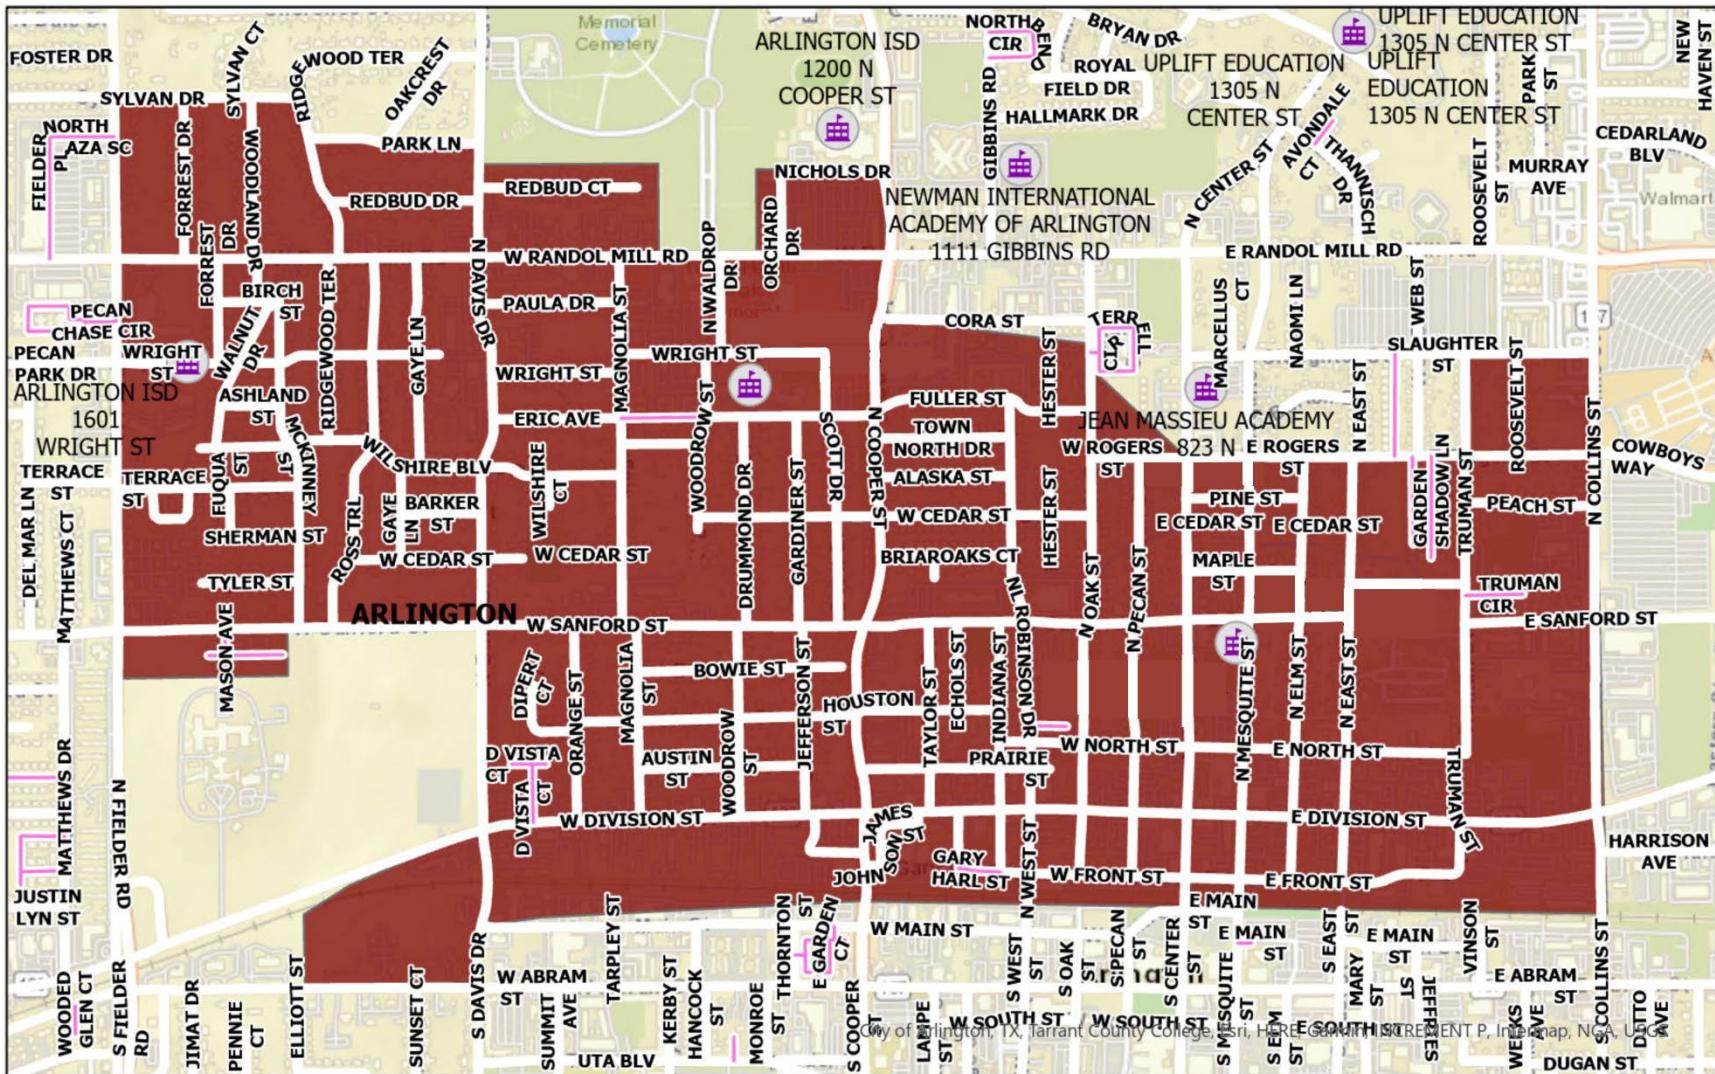

Figure 1: West Sanford Street Ground Spraying Area Map

A highlighted map of the targeted ground spraying area. The ground spraying area includes neighborhoods north and south of Sanford Street, situated between North Fielder Road and North Collins Street. The perimeter begins at the northwest corner, which is the intersection of Sylvan Drive and North Fielder Road. The north boundary runs east along Sylvan Drive and Park Lane, staying just north of Redbud Court. It then turns south to Randol Mill Road, continues east on Randol Mill Road briefly, and turns back north to the area around Nichols Drive and North Cooper Street. It follows Nichols Drive for a short distance before turning south along Cooper Street to Cora Street. It then follows North Cooper Street briefly before going back east on Cora Street. From Cora Street, the boundary angles southeasterly until it reaches East Rogers, continuing east on East Rogers to North Collins Street. The east boundary generally runs south along North Collins Street to a point just south of Harrison Avenue. From there, the south boundary runs straight west until it reaches South Davis Drive. The designated area includes the neighborhood between Elliott Street and South Davis Drive, and north of West Abrams. The west border generally follows South Davis Drive north to West Sanford Street. Upon reaching West Sanford Street, the boundary extends westward to North Fielder Road, and then follows North Fielder Road north to Sylvan Drive to close the perimeter.
